Ranchi

The Indian Institute of Management Ranchi successfully organised Startup Conclave 2026 at its campus auditorium on February 18, bringing together startup founders, investors, venture capitalists, industry leaders, academicians, and students from across the country.

Centered on the theme “Entrepreneurship for Sustainability, Society, and India’s Future,” the conclave explored how startups can drive economic growth while addressing pressing social and environmental challenges. In his inaugural address, Director Professor Deepak Kumar Srivastava described entrepreneurship as an expertise rather than merely a profession.
